Work History

Wipro, Plano, TX — **October 2021 to Present**

Salesforce Technical Architect

Client: TD Bank

A leading financial institution that provides Retail, Commercial and Wealth Banking services to millions of customers. Their KYC implementation was a mission-critical project.

- Architected and implemented end-to-end KYC solutions on Salesforce, designing data models, security controls, and workflows to meet KYC/AML regulatory requirements.
- Designed, built, and governed integrations between Salesforce and Pega CRM, defining APIs, data mappings, orchestration, and error-handling patterns to ensure data consistency and reliability.
- Collaborated directly with business stakeholders and business analysts to translate regulatory and operational requirements into detailed technical designs, user stories, and implementation specifications.
- Led hands-on technical oversight of Salesforce development teams, conducting design and code reviews, resolving complex issues, and enforcing architectural standards and best practices.
- Owned end-to-end technical delivery, validating functional accuracy, data integrity, security compliance, and performance across Salesforce and integrated enterprise systems.

Client: United Health Care
One of the largest health insurance providers in the United States. Offers a wide range of health plans and services to individuals, families and employers.

- Collaborated with their Product Owner team to understand the requirements and use cases.
- Worked with their technical team to establish connectivity/integration among various systems.
- Successfully implemented a POC to the satisfaction of their QA and Product Owner team.

Client: PNC Bank
It is a prominent financial institution that offers a wide range of banking and financial services to individuals, businesses, and organizations. They had a Salesforce org with Service Cloud and Sales Cloud with thousands of users. I collaborated on projects that catered to Wealth Management, Investment Banking, Small Business Banking and Retail Banking sectors.

- Provided technical guidance for many critical projects including big ticket items that impacted numerous downstream systems.
- Spearheaded several integrations considering scalability and high-performance with Confluent Kafka, Splunk, Informatica and other technologies.
- Led multiple different teams in collaborating and delivering successfully implemented solutions.
- Addressed and tackled a wide variety of technical challenges with Event Driven Architecture.
- Implemented Change Data Capture capabilities and integrated multiple systems.

NTT Data Services, Plano, TX **June 2020 to September 2021**
Salesforce Technical Architect

Client: Jackson National Life Insurance
The company specializes in retirement planning and annuities, helping individuals secure their financial future.

- Translated business requirements into well architected solutions for a major insurance client.
- Collaborated with the project management team to communicate technical issues and drove timely resolutions.
- Distributed development tasks to team members and mentored developers.
- Conducted code reviews to ensure code quality is at the highest level possible.

CapGemini, Boston, MA **Oct 2019 to May 2020**
Salesforce Technical Architect

Client: National Grid
It is a multinational energy company that operates in the United States and the United Kingdom. It focuses on delivering electricity and natural gas to homes and businesses. They had Service Cloud and Field Service Lightning Cloud to service their customers.

- Presented technical alternatives and recommendations aligned with the client's business and technology requirements.
- Interacted with Business, Project, and Integration teams to deliver complete technical solutions.
- Provided technical expertise to on-going projects to improve design and mitigate architectural issues.
- Mentored technical offshore team and guided them on development and implementation.
- Contributed to project estimating and planning activities.

Texas Capital Bank, Richardson, TX **Oct 2017 to Oct 2019**
Salesforce Technical Architect/Sr. Developer

- Implemented the flagship purchase nCino – bank operating system on Salesforce platform.
- Designed transformational technical solutions by working directly with customers and business.
- Led the customization effort and coordinated with consulting firm's engineers and analysts.
- Established a release process with Center of Excellence (COE) for Salesforce ecosystem and managed monthly releases.

Slalom Consulting, Dallas, TX **July 2017 to Oct 2017**
Salesforce Technical Architect

- Worked for the financial client and with their business experts and users to gather, analyze and refine requirements to build a community portal.
- Designed SFDC data models to accommodate back-office ERP schema.
- Established Identity-Provider initiated Single-Sign-On from a legacy application.

Experian, Allen, TX **Jan 2017 to Jun 2017**
Contractor - Technical Architect/Sr. Developer

Global Corporate System Sales
- Served as a technical lead for the CRM system on a day-to-day basis.
- Worked with the business subject matter experts and business users to develop/validate requirements.
- Worked on integration with several external applications including Callidus Cloud CPQ, Seal, Aria etc.
